

# US Army Corps of Engineers Donlin Gold Project EIS

## Comment Form

The Corps welcomes your comments on the Draft Environmental Impact Statement. If you'd like to mail your comments, please feel free to use this form. Write your comments below then fold this page in thirds so the mailing address shows. Additional pages can be inserted. Remember to affix first class postage. You can also email your comments to [POA.donlingoldeis@usace.army.mil](mailto:POA.donlingoldeis@usace.army.mil), or fax them to (907) 753-5567.

Important topics for comments would include:

- Comments and questions about the accuracy of information in the Draft EIS.
- Comments and questions about the adequacy of methods or assumptions used.
- New information to be considered in preparing the Final EIS.
- New reasonable alternatives or revisions to current alternatives.
- Additional measures to reduce impacts (mitigation).

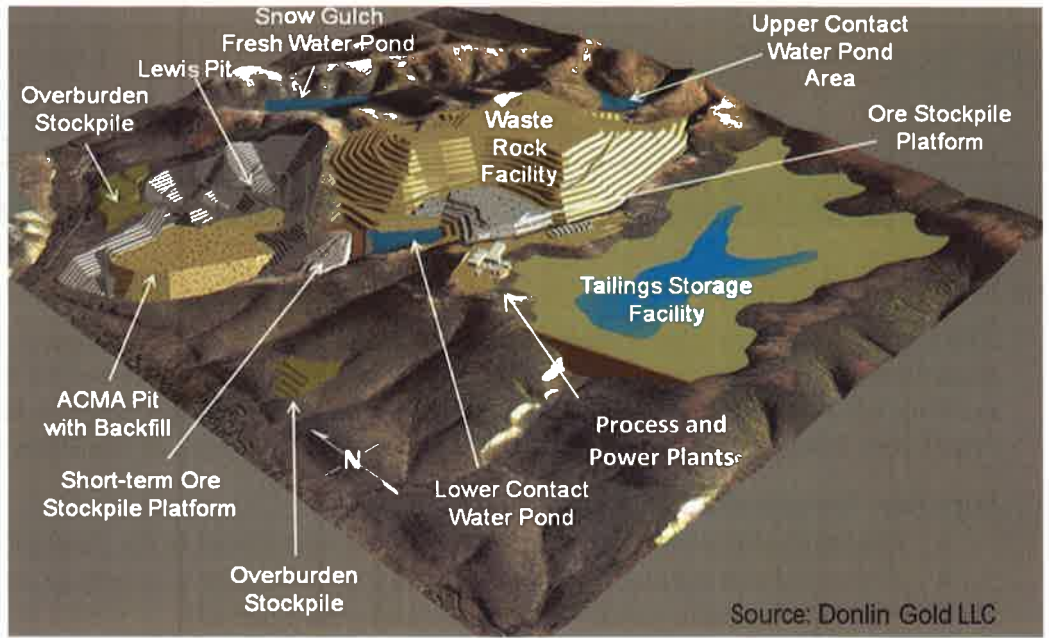

I'm for alternative 1 (No Action Plan) for the proposed project even though it would bring jobs to this economically depressed region. Mining generally destroys and kills all living things including land, water, animals and species of small fish and salmon. If the tailing holding area is breached it has the potential to kill all living things on the Yukon and Kuskokwim Rivers including those people residing below Donlin. Barges coming up and down the Kuskokwim may potentially have an impact on our salmon especially the Chinook that we have been trying to conserve within the last 3-4 years.

**Layout of Proposed Mine Site**

The image to the right illustrates the eventual layout of a proposed gold mine, ten miles north of the community of Crooked Creek on the Kuskokwim River in southwestern Alaska, for which the US Army Corps of Engineers is preparing an EIS. The project, proposed by Donlin Gold, LLC, includes a natural gas pipeline and transportation and components. You may use this mail-in form to submit comments.
