

US Army Corps of Engineers
Donlin Gold Project EIS

Comment Form

The Corps welcomes your comments on the Draft Environmental Impact Statement. If you'd like to mail your comments, please feel free to use this form. Write your comments below then fold this page in thirds so the mailing address shows. Additional pages can be inserted. Remember to affix first class postage. You can also email your comments to POA.donlingoldeis@usace.army.mil, or fax them to (907) 753-5567.

Important topics for comments would include:

- Comments and questions about the accuracy of information in the Draft EIS.
- Comments and questions about the adequacy of methods or assumptions used.
- New information to be considered in preparing the Final EIS.
- New reasonable alternatives or revisions to current alternatives.
- Additional measures to reduce impacts (mitigation).

Chap 3: Concern brought up on dredging of rivers: If water low for quite some time - will this (barge transport) process change, will it continue or is there another route?

concern on fish habitat. I live a subsistence lifestyle. Our river is home to where our fish return, lay eggs, live & return to inlet, bays, ocean. Will you all continue to cross or use rivers that provide food for our community?

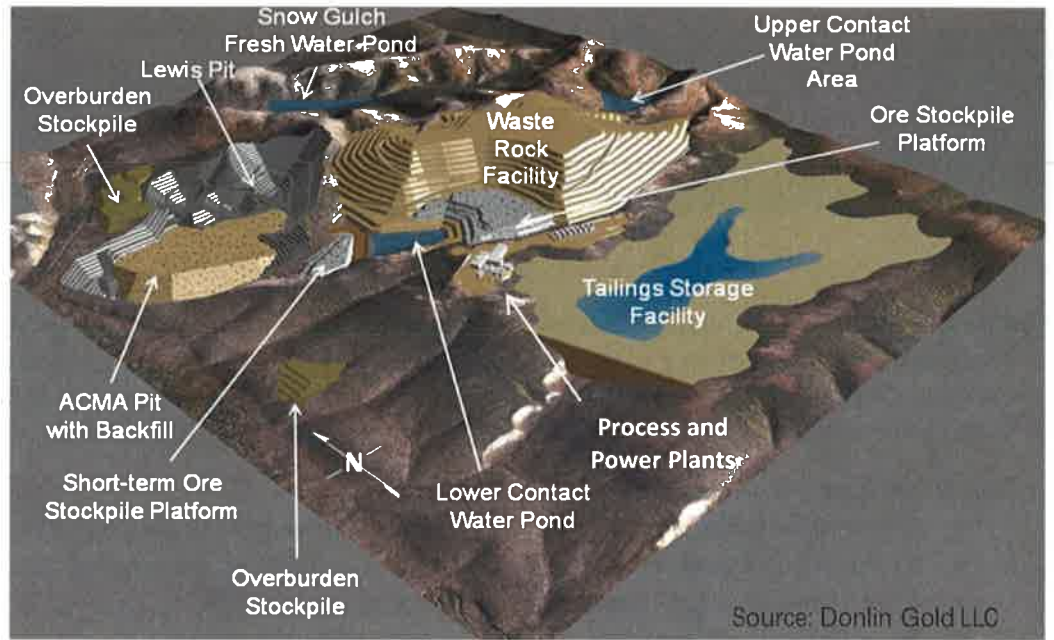

How are you preventing decreasing the effects of fish habitat, life. If rivers are pathway to fish, but fish habitat is low - (numbers), are you still going to use rivers as roadways for the barges?

Layout of Proposed Mine Site

The image to the right illustrates the eventual layout of a proposed gold mine, ten miles north of the community of Crooked Creek on the Kuskokwim River in southwestern Alaska, for which the US Army Corps of Engineers is preparing an EIS. The project, proposed by Donlin Gold, LLC, includes a natural gas pipeline and transportation and components. You may use this mail-in form to submit comments.
