

The public comment period on the Donlin Gold project has been extended.
Use this postcard to comment.

Please send your postcard to the U.S. Army Corps of Engineers with postmark before the **May 31, 2016** deadline.

Given the existing technology and strict adherence to EPA compliance requirements and Zero Tolerance for NON compliance, there must be some common ground targets the project started and adjust when the need arises. Develop a compromise that insures the highest degree for success. If it pencils out to be profitable and doesn't violate the EPA guidelines.

GO FOR IT.

Hank
